

IRC4FUN GDPR - DATA CLASSIFICATION

PLEASE READ THOROUGHLY - COMPLIANCE IS MANDATORY

With EU's new **GDPR** law going into effect **May 25th, 2018**; we all need to be prepared for this law when it goes into effect. This document classifies Data and the requirements for GDPR.

DATA CLASSIFICATION

- **IP Addresses** - IP addresses of any IRC4Fun user or Staff user should *never* be released to *outside parties, users, companies, or inquiries*. (This still technically applies, even if the user is a *spammer* or *troublemaker*. You can add respective bans that reveal the IP address to prevent further abuse (if applicable) where they may be visible to other users when the ban is added. You **CANNOT** give the IP address to **any other parties, nor explain who the IP address belongs to.**) Discussions involving IP addresses should always be active in Staff-Only channels.
- **Email Addresses** - Email Addresses of registered users must *never* be given or provided to non-IRC4Fun parties, companies, individuals, etc. *Email addresses should be considered as "private" as an IP address is, to a user.* Email Addresses of registered users will only be used for **official purposes related to IRC4Fun: X username/account password-resets, and confirmation reasons.** YOU MAY NOT PROVIDE A REGISTERED USER'S EMAIL ADDRESS TO ANYONE, EXCLUDING IRC4Fun Staff.
- **Real Names** - IRC4Fun **does not** collect the real-names of *users*, but it **DOES** collect the real-names of *Staffers* and *Server Administrators* applying to link to IRC4Fun. **This information should obviously never be released to anyone that is not IRC4Fun Staff.** As far as *users* go, their Real Name is never collected in any *official* or *registration* capacity. Their realnames as given to the IRCd Servers when connecting (*since it is usually fake*) are also visible to users. (Staff should not provide the output of a /WHOIS on a user, meaning Staff should never have any reason to disclose the "given" name of a client or Staffer)
- **Passwords** - IRC4Fun and IRC4Fun Staff **cannot see user passwords**. Passwords are *encrypted* in our database. Because of this, any passwords *lost* must be *reset by Staff after they have verified the user's identity via Email, using the NEWPASS user NewPassword command.*

COMPLIANCE IS MANDATORY SINCE IRC4FUN SERVES INTERNATIONAL USERS

Compliance with this Data Classification Policy is mandatory. Any violations of the Data Classification policies can and will result in Corrective Action.
