

GDPR - INTRUSION DETECTION POLICY

PLEASE READ THOROUGHLY - COMPLIANCE IS MANDATORY

With EU's new **GDPR** law going into effect May 25th, 2018; we all need to be prepared for this law when it goes into effect. This document clarifies our Intrusion Detection Policies.

IRC4FUN SERVERS AND SERVICES SHOULD BE MONITORED BY SERVER ADMIN

Each IRC4Fun Server Administrator is *responsible* for ensuring that their server(s) are **secure** and *should notify* IRC4Fun Admins **immediately** of any suspicious activity.

IRC4Fun's *Services Server* and *Web Servers* are monitored vigilantly for any anomalies.

Any suspected breaches will be thoroughly investigated **and immediately reported to IRC4Fun users via our Website or by Email.**

In the event that a breach is found; IRC4Fun will immediately take down the breached server(s) or service(s) while they are investigated and re-secured. We will also immediately notify users via our website, email, or on IRC.

In the event of a breach; we recommend changing your password(s) as soon as possible to a password that is unique, safe and **not** used by other *websites, services, IRC networks, servers, etc.*
